End to End IT Services and Solutions for Manufacturing Industry

Overview

Manufacturers across globe are facing tough times due to increasing costs and competition. This raises the need to focus on automating their business processes. And this process becomes even more critical when they try to achieve higher flexibility and agility to respond to dynamic market conditions and prepare them to introduce new products and services to market. The biggest concern lies in optimizing the traditional supply chain as companies tend to procure from low-cost centers. This results in highly complex supply chains that are difficult to manage. Some of the other concerns are:

- Increasing Operational Overheads
- Identifying and Eliminating Redundancies
- Ineffective Technology Solutions
- Organizational Misalignments

At Xavient, we understand the complexity of manufacturing industry, the common drivers across segments, and the challenges that arise due to intense pressure of reducing operational overheads and optimizing the existing supply chain. In order to help manufacturers address these challenges, we offer end to end IT-application and infrastructure services that cover the entire IT cycle.

- Optimize Manufacturing Operations
- Modernize Legacy Systems
- Improve Decision Making
- Create Rich Customer Experience
- Deploy Highly Flexible IT Systems
- Lower Total Cost of Ownership

Xavient's Practice for Manufacturing

Having years of experience in building and implementing end-to-end supply chain solutions from leading vendors and partners, Xavient help manufacturers to optimize their supply chain by reducing costs and inventories. Our supply chain solutions offer seamless integration of entire supply chain operations with shop-floor applications by providing real time integration with back-end operations. Our alliance partnerships with product principals like SAP, Oracle allow us to integrate these packaged solutions and build real time collaborative frameworks that connects clients with suppliers and partners.

Manufacturing Execution Systems

Xavient's solutions in Manufacturing Execution systems help address the gaps between shop floor and control systems on one hand and the enterprise level ERP systems on the other. Our solutions result in firm control over manufacturing activities and ultimately, in first-time, end-product quality and production repeatability. Xavient's solutions leverage industry best practices for implementation and integration. With Xavient, manufacturers can improve their transaction throughput by 2 to 10 times and reduce support and maintenance costs by 45%.

Service Offerings

Supporting global manufacturing businesses, Xavient makes a difference through the addition of value. We believe that our understanding of manufacturing operations as exemplified through our industry specific solutions like operations visibility dashboards, enterprise performance analytics, and remanufacturing among others, is a significant differentiator vis-a-vis our competition.

Our Key service offerings for manufacturers:

Transformational Services/Business Consulting

Xavient's consulting assists our forward-looking customers to develop a roadmap that aligns business strategy with IT strategy. It offers an integrated approach towards business processes, technology, application and data to deliver end-to-end services that supports transformation across the enterprise.

Infrastructure Services

Xavient's Infrastructure Services addresses the growing demand for cost-effective management of technology infrastructure. With a vision to develop innovative solutions for enterprises worldwide, the company pioneered a unique model for Remote IT Infrastructure Management that enables organizations to achieve superior infrastructure performance and significantly optimize costs.

Quality Assurance & Testing

Xavient's Testing Centre of Excellence (TCoE) provides a bouquet of managed testing services for organization of any size. Our testing methodology covers the entire gamut of the software development lifecycle right from the planning stage and test cycles to fix test cycles.

Application Development & Maintenance

Our application development services help manufacturer's address evolving business needs and technology challenges by defining, designing and building applications tailored to meet business requirements.

BI/Analytics

With our industry knowledge and experience in business analytics and intelligence, we can help you with insights to improve the decision making process enabled through reporting, dashboards and data integration and management.

Advantage Xavient

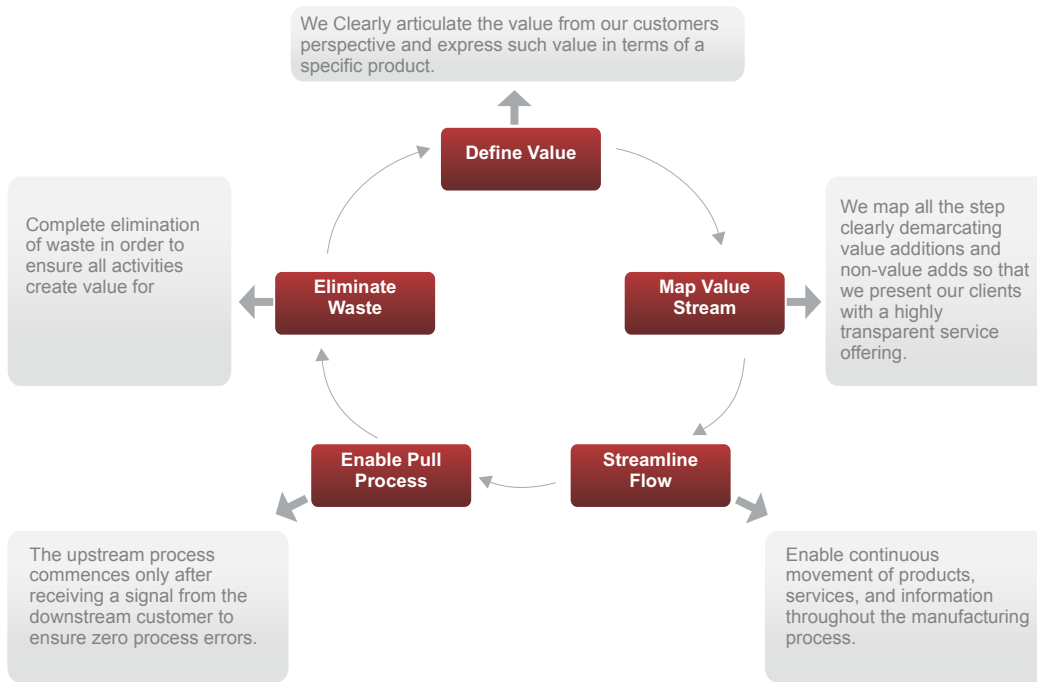

Xavient combines its expertise in technology with a profound understanding of the manufacturing industry to provide innovative solutions and services. Our proven implementation methodology and frameworks based on best practices reduce risks and project overruns. Our experience across upstream and downstream systems ensures smooth integration. We help our manufacturing customers realize value by:

- Optimizing manufacturing operations
- Enhancing visibility into supply chain operations
- Ensuring greater responsiveness to demand fluctuations
- Enabling revenue growth through enhanced customer experience
- Identifying performance issues early
- Providing testing and monitoring tools to speed up assessment and remediation
- 24X7 support from offshore ensuring quality support at lower cost

Xavient's lean principles to deliver optimum value

At Xavient, we leverage the **principles of lean** to eliminate wasted efforts, shrink delivery timeline, and streamline processes. We identify activities that do not create value for our customers and implement strategies to make such processes redundant while mitigating any associated risks. Xavient's lean **methodology reduces costs, defects, lead time, inventory, and waste while improving productivity, customer** satisfaction, profits, customer responsiveness, capacity, quality, cash flow, and on-time delivery.

The five key principles of our lean methodology are:

- ISO 27001 Certified
- CMMI Level 5 Compliant
- ITIL Aligned
- Mandatory Certification on Domain & Technology
- Active Member of Industry & Partner Technology Forums

About Xavient Digital, powered by TELUS International -

- Headquartered in Simi Valley, CA, Xavient Digital, powered by TELUS International (Formerly Xavient Information Systems), is a leading provider of global IT and engineering services and solutions. Since its inception in 2002, Xavient has grown to be a tier-one IT Professional Services and Solutions provider for telecommunication, broadcasting, manufacturing, retail, and healthcare companies.
- It is the preferred transformation partner across product and vendor evaluation; business process re-engineering; outsourcing and off-shoring; product implementation; custom solution development and IT professional services for several Fortune 1000 companies.
- Xavient leverages its proven expertise in Global Delivery Models with centers of excellence in Application Development, QA & Testing, Managed IT Infrastructure services and IT Application & Production environment.
